

Inventories

Inventories enables Producer Groups to accurately track and manage stock levels across field and store

Professional stock management without the spreadsheets

- One view of all your suppliers' crops at every stage of production
- Updated in real-time via the mobile app or web
- Share your inventory status with customers and growers
- Track stock from the moment crops are planted through to delivery

The screenshot displays the 'Farm' section of the KisanHub interface. It includes a navigation bar with 'Home', 'Farm', and 'Supply Chain'. The main content area is divided into several sections:

- Fields:** A summary card showing 'Expected tonnage' of 239 and 'Cropped area (ha)' of 81. It includes 'Export' and 'Edit' buttons and a 'Filter' dropdown.
- Stores:** A summary card showing 'Available' stock of 3169t and 'Adjustments' of -1581.
- Search:** A search bar with 'Worthingtons' entered, and fields for 'Field' and 'Variety'.
- Results:** A table listing 16 crops across 8 different crop types. The table has columns for 'Grower' and 'Progress'.

Grower	Progress
A Edwards Onion (10.89 ha) PLOT-2016-17-0338	Planting 18/03/2018
A Edwards Cornets End (6.19 ha) PLOT-2016-17-0730	18/03/2018
A Edwards Pond Field (4.93 ha) PLOT-2016-17-0731	03/09/2020
- Timeline:** A section showing a list of events with dates and comments, such as 'Stock Adjusted (-27 t)' and 'Estimated Loss rate ch'.

Inventories

A joined up view of fresh produce from your supplier network currently in field or store

Reduce Waste

With greater visibility of your fresh produce portfolio you can move stock in good time before wastage occurs.

Streamline Operations

See planned harvest dates and expected yields to help you plan logistics and movement of stock.

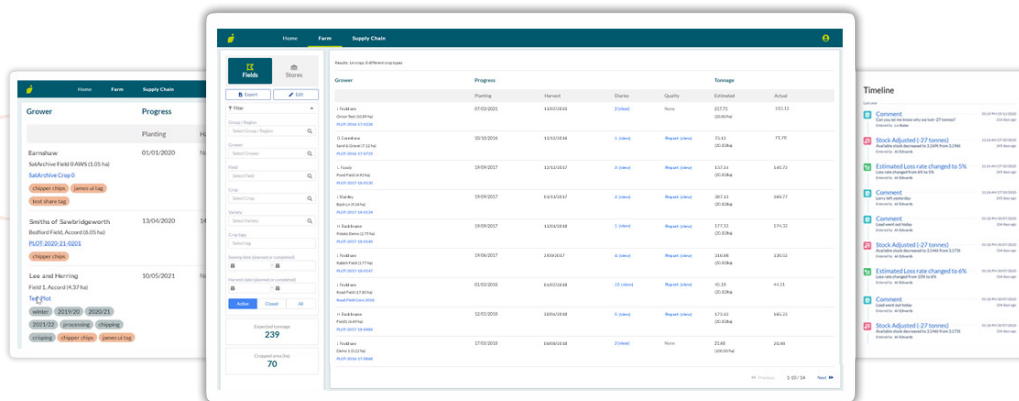

Smarter Trading

Trade with more confidence knowing what's in the store and what's coming in from the field.

Complete visibility of stock levels from planting to packhouse

When your reputation depends on continuity of supply, *Inventories* gives you complete visibility of stock at every stage of production. No more short orders, no more unhappy customers.

For Procurement Teams

Greater visibility for seasonal planning and managing throughput of stock.

For Commercial Teams

Negotiate with confidence knowing there is a well managed supply available from the grower network.

For Supply Chain Analysts

Use the data to model a range of scenarios to reduce waste and optimise the movement of stock.

An end-to-end view of supply from your entire grower base

Inventories enable Producer Groups to view their current stock levels across their entire supplier network. Annual or perennial, *Inventories* works with all crop types and tracks the availability of predicted and actual stock from the moment the seed is planted, through harvest and storage until it's delivered to the packhouse.

Choose between the *Fields* and *Stores* views to see the complete range of predicted yield and stock currently available in the store.

Fields View

Fields View is automatically populated with field, crop and plot details from KisanHub's Monitor application. It shows your entire range of available stock from your supplier network currently in field along with predicted yield and harvest dates.

Grower	Progress		Tonnage			
	Planting	Harvest	Diaries	Quality	Estimated	Actual
J Packham Orion Test (30.89ha) PLOT 2016-17-0328	07/03/2021	12/03/2020	2 (view)	None	217.71 (2000ha)	215.12
B Eastover Sand & Gravel (7.12 ha) PLOT 2016-17-0733	19/10/2015	12/11/2016	1 (view)	Report (view)	73.12 (2000ha)	71.76

Here, you can also access field diaries and lab assessments when connected to KisanHub's Monitor and Quality solutions.

Use *Edit* mode to keep your inventory details up to date. Fields can be edited to add final harvest dates and yield values when available.

Grower	Progress				Tonnes		Active
	Planned planting	Completed planting	Planned harvest	Completed harvest	Estimated	Actual	
A Edwards Orion Test (20.89ha) PLOT 2016-17-0328	07/03/2021				217.7		<input checked="" type="checkbox"/>
A Edwards Sand & Gravel (7.12 ha) PLOT 2016-17-0733	19/10/2015						<input checked="" type="checkbox"/>
A Edwards Peach (6.83 ha) PLOT 2017-18-0130	19/09/2017						<input checked="" type="checkbox"/>

Crop Tags

Add searchable custom tags to each crop to track and identify stock using your own categories. Crop Tags can be used with ERP integrations to provide additional information at the packhouse or factory.

Find stock faster

For Producer Groups working with multiple growers, tracking a large number of farms, fields and plots can quickly become unmanageable.

Inventories gives you a powerful filtering tool to help you find what you need quickly. Filter crops by grower, field, variety, custom tag and date range.

Export to Excel

Download an Excel file of your entire inventory and import into third party applications for additional analysis.

All KisanHub applications can be integrated with third party platforms via an open access API.

Stores View

Click on the Stores tab to see your current stock levels available post harvest. Use the Filter tool to locate the Lots you wish to view. Click on the Lot and Store links to see more detailed information (below).

Grower	Store & Lot	Crop	Tags	Harvested	Tonnage In	Available	Quality
